## PROFESSIONAL SUMMARY

Innovative Full-Stack Web Developer with expertise in building scalable backend architectures (Golang, PHP) and engaging frontends (React, Vue). Passionate about bridging software engineering with data science and artificial intelligence. Experienced in leading full-cycle web development, integrating secure payment gateways, deploying live applications, and incorporating AI functionalities to create smart, user-centric digital solutions.

## TECHNICAL SKILLS

**Programming Languages:** PHP, Golang, JavaScript, Python

**Web Frameworks & Libraries:** Laravel, React, Vue.js

**Data Science & AI:** Pandas, NumPy, Scikit-learn, AI Model Integration (Gemini AI)

**Databases:** MySQL, PostgreSQL

**Tools & Operations:** Git, RESTful APIs

## EXPERIENCE

**Data Science Member (Learning Community)** *April 2026 – Present Basic Computing Community*

- Currently studying machine learning concepts and the basics of deep learning.
- Completed a machine learning classification project for predictive modeling.
- Developing practical skills in data analysis, data modeling, and neural networks.

**Web Developer (Freelance)** *Jan 2025 – Present Jobnation.id*

- Develop and maintain high-performance web applications, ensuring optimal scalability and seamless user experience.
- Collaborate with cross-functional teams to architect reliable digital solutions and implement best practices in software engineering.

**Web Developer & Technical Mentor** *Jan 2024 – Dec 2025 PT Hummatech*

- Developed robust web applications using Laravel and JavaScript, improving overall system functionality and responsiveness.
- Mentored interns and vocational high school (SMK) students, guiding them through real-world software development lifecycles and modern coding standards.

**Web Developer Intern** *Jan 2023 – Dec 2024 PT Hummatech*

- Assisted in developing and maintaining dynamic web applications, focusing on frontend interactivity and backend logic.
- Wrote clean, maintainable code and participated in team code reviews to ensure product quality.

## PROJECTS

**PastiPanen** *Full-Stack Developer*

- Developed and managed a comprehensive web application for the agricultural sector using Laravel.
- Handled complete server deployment, including environment configuration, SSH management, continuous updates via Git, and secure HTTPS/SSL implementation.

**Coby Learn AI** *Full-Stack Developer*

*AI-Powered Learning Platform*

- Engineered an AI-powered educational platform using a Golang REST API backend and React frontend to summarize learning materials (PDFs, YouTube, Text).
- Integrated the Gemini AI model for automated content summarization and smart learning assistance.
- Implemented gamification features including daily learning streaks to boost user retention and study consistency.

**GetSkill** *Project Lead & Full-Stack Developer*

*EdTech Platform*

- Led end-to-end development of a single-vendor e-learning platform, defining system architecture and project roadmaps.
- Developed core functionalities including user authentication, structured course management, and seamless frontend-backend integration.
- Integrated the Tripay Payment Gateway to facilitate secure digital transactions and automated course access provisioning.

## Dolfin Brain

Full-Stack Web Developer

### Learning Management System

- Built a structured LMS tailored for CPNS preparation with role-based access control for premium and free educational content.
- Integrated secure payment processing via Tripay Payment Gateway for transaction verification and course enrollment.
- Designed an interactive student dashboard to track learning progress and material access effectively.

## EDUCATION

---

### Brawijaya University

2025 – Present Information Systems | GPA: 3.86

Focus: Business Intelligence, Information Systems, and Data Science

### SMKN 1 Kepanjen

2021 – 2024 Software Engineering (Rekayasa Perangkat Lunak)

Focus: Web Development and Information Technology

## CERTIFICATIONS

---

- **Machine Learning With Python** - IBM (2025)
- **Golang Bootcamp** - Sanbercode (2024)
- **Belajar Machine Learning untuk Pemula** - Dicoding (2024)
- **Data Visualization** - Dicoding (2024)

## AWARDS & ACHIEVEMENTS

---

- **1st Place Winner** — IT Competition 8.0 (*Web Development / Software Development*), 2026
- **1st Place Winner** — JKB Festival (*Web Development / Software Development*), 2026
- **1st Place Winner** — MTQ Universitas Brawijaya, Application Design Division (*Web Design*), 2026
- **3rd Place Winner** — T Arts 3.0 (*Web Design Design Competition*), 2026
